

# Plagiarized Homework

Chloe is 17 years old and attends her local college where she is taking four 'A' levels. In the most part, Chloe really likes her studies, but she finds her Maths A level really hard.

Chloe's Maths grades are slipping and she is concerned as she needs to get a grade A to be able to go on to study Medicine at Edinburgh University. Chloe's parents are not happy with her seemingly slow progress.

Chloe notices an advertisement on her Facebook page for a company that writes 'A' level coursework and essays for a fee.

Feeling stressed and under pressure, Chloe decides to pay an online company to write her Maths coursework for her.

Chloe's school detects that her coursework is plagiarized. As a result, she is excluded from School and loses her chance to study Medicine.

**Who is responsible for Chloe submitting a plagiarized piece of coursework?**

***Option A: Chloe***

***Option B: Chloe's parents***

***Option C: The coursework writing company***

***Option D: The person who made the algorithm***
